Keying Options to fit your facility's needs

Keyed Different

Each lock is opened by its own unique key which does not open any other lock in the set – complying with the “One lock, one employee, one key” mantra

Keyed Alike

All padlocks in the set are opened by the same key so only one key is necessary to open numerous padlocks – for employees who need many locks, they still only have one key

Master Keyed

A master key opens all locks within the system while each lock also has its own unique key – allows for responsible removal of improperly placed or forgotten lockouts according to your emergency notification policy
